### What has FAMS done in the last year?

We provide unbiased advice regarding funerals planning. Memorial society work is just as necessary today as it was decades ago. We have firsthand experience of our member's issues to attest to this need.

### Pre-paid vs Pre-arranged

Statistically most funeral providers offer insurance versus accepting payment in advance. Advance payment requires the funeral home to maintain trusts which are registered by the BAO. If no monies are paid, there is no obligation to the funeral home or consumer as there is no contract.

## Newsletter

Disruption has come to our lives. The planned Annual General Meeting (AGM) was slated for May in the Royal Botanical Garden's (RBG) meeting room. We were offered splendid meeting rooms, free parking, and full access to enjoy the gardens before and after our meeting. Tiptoeing through the tulips was a lovely concept.

We are mostly enjoying a spectacular fall with unfortunately more restrictions and bad news. A short time ago travel outside the Greater Toronto Area felt like freedom ... you could sit in a restaurant! Things have changed - now many other Canadians across the country are adapting to increasing public restrictions and measures.

FAMS has come a long way in the past year. Our memberships are now automated, and the ongoing cost of our application is offset by eliminating paid administrative support. Communications using our "new tools" is now an investment in time and teamwork - no printing, no stamps, no expensive mail returns. FAMS is finding new supporters and past members are rediscovering our society.

## On the agenda

Please feel free to contact FAMS with any questions or concerns either at our email address - [info@fams.ca](mailto:info@fams.ca), or phone at 416-241-6274.

28 minutes, very informative and entertaining.

Short excerpt:

*"I feel like I am O.K. with some versions of my own death. Like, maybe I go for a nice long walk, then I have dinner with my wife and daughter, maybe a phone call with an old college friend, and then a meteor hits the earth.."*

*There is one last death scenario I'd be O.K. with. To recap, so far it's:*

- 1. Dinner with my family and then a meteor.*
- 2. Simon & Birbiglia followed by explosion."*

*Ontario is considering converting emergency pandemic measures on signing wills electronically into permanent legal reforms and some lawyers are urging the province to make fully digital wills a reality."*

### **And from The Toronto Star: Why I am asking the Supreme Court to protect 10 public cemeteries**

Created as a public trust, but now controversially, and I believe wrongly operated by its board and management as a private company. It is time for the cemetery's status to be legally clarified, and rightfully returned to the citizens who paid for it.
